

ITANOVIN

INDUSTRIAL ENGINEERING & SOLUTIONS

THE COMPANY

Itanovin Inc. is a Project Management Company that has been established on the experience gained over the years within the **Cruise line industry**.

We undertake projects and we deliver turnkey project management solutions for every **repair or maintenance** that is needed on Cruise Ships.

SERVICES

The services provided for our customers, include inspection and planning. A full analysis of the project is crucial in order to be time effective and reliable. Our primary concern and aim is the detailed organization and implementation of all the operations on board the vessels.

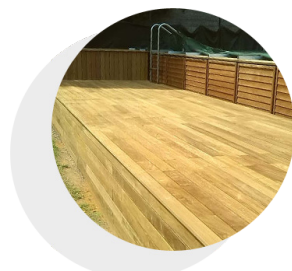

Our areas of expertise are interior projects, **HVAC maintenance (repair, fabrication, renewal)**, and any metal work concerning the vessel's metal accessories and structure.

We can also provide architectural projects for **industrial building**.

HVAC

Our specialty is HVAC systems. We can manage the design and installation of the HVAC systems on the vessel. We design and install ducts, cable trunking and we make full unit replacements on vessels.

INTERIOR DESIGN

Itanovin.Inc is a full service firm specializing in high end residential, restoration and interior projects. The mission of Itanovin.Inc is to create interiors that are timeless, original and warm.

METAL WORKS

Our experience in carbon steel and aluminum manufacturing gives us the opportunity to expand our services to the construction field.
